

Technical specifications and price list EUR -2019

valid to 31.10.2019

Major dimensions

Length of hull	6.00 m
Width of hull	1.70 m
Draught	0.25
Displacement approx.	600 kg
Crew max.	7 Pers
Engine	Weber
Engine type	MPE 850 Marine TC
Max. Power	155 PS/116 kW
Max. Torque	145 Nm
Max. Speed	approx. 40 Kn
CE-Norm	Kat. C

Shell

Composite construction in high-grade structural foam with low alkali glass skin. Lamination designed for maximum rigidity with minimum weight. Composite parts are manufactured with Sprint technology. All horizontal surfaces (foredeck, seats, engine compartment, floor) are covered in solid teak slats and trim. Coaming in solid teak. Teakwood strake. Below waterline treated with VC-Tar and VC17m. Entire boat is self-draining!

Fittings

Three hinged stainless steel cleats. Stem eye in bow. Flush fitting stainless steel hinges and hatch fastenings. Telescopic stainless steel bathing ladder at stern. Chromium steel safety grab handles at stern.

Deck layout / cockpit

Central steering column. Passenger seats left and right of helm. Central seating in front of helm with icebox under bench. Large sun pads in bow and over engine compartment. Large stowage spaces under sunpads.

Technical equipment

Safe-T-QC steering. Single lever speed controls. Engine/Starter battery. LED navigation lights. Watertight instrument panel. 12V sockets. Flush mounted digital engine data displays.

Paintwork

All paintwork with ALEXSEAL system. Color of inner and outer shell to customer requirements in accordance with ALEXSEAL color range. Special paintwork see ‚Options‘.

Engine

Weber MPE 750 Marine TC (140 hp) with Webe Jet 148 propulsion. For immatriculation on Lake Constance/Bodensee the engine will be configured to 100 hp.
